GAZON ARTIFICIAL

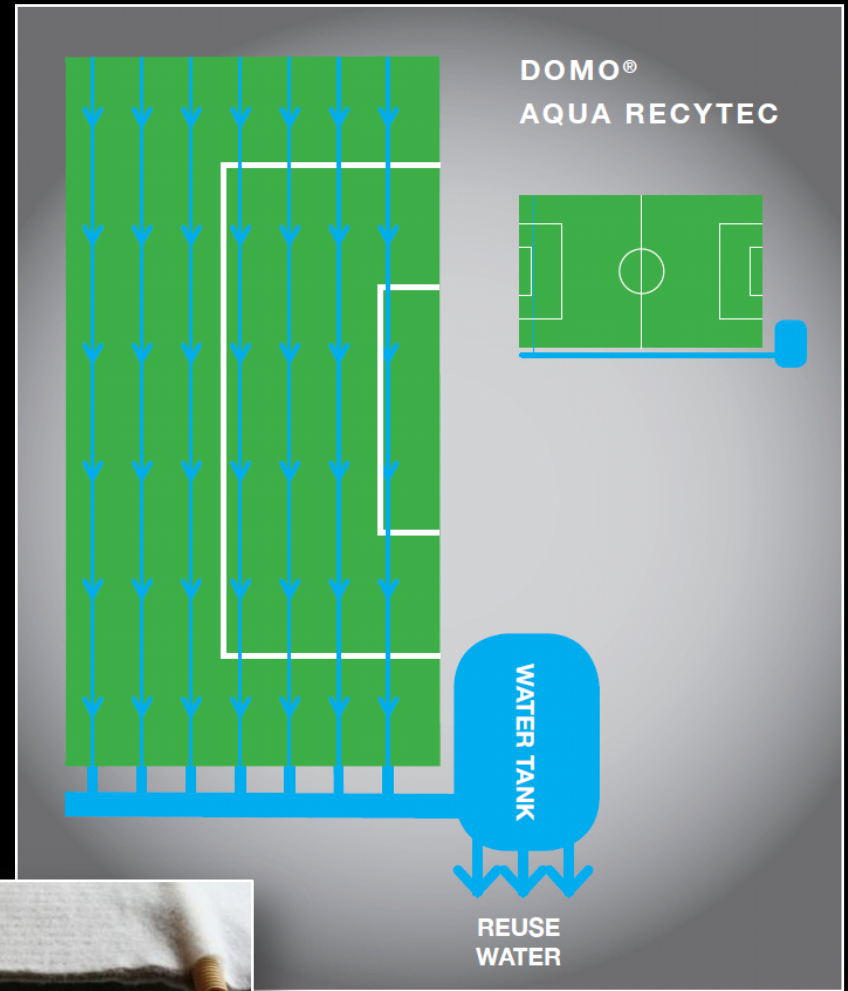

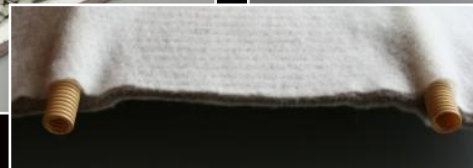

CONSTRUTIE INFRASTRUCTURI

FUNDATIE TRADITIONALA

DOMO® AQUA RECYTEC

- Sistem accesibil financiar
- Permeabilitate ridicata
- Instalare rapida
- Mai putine materiale grele folosite
- Mai putin pamant escavat si mutat
- Apa captata se poate reutiliza

DomoCompac System

> **SOLUTIE PENTRU ECONOMISIRE LUCRARI DE INFRASTRUCTURA**

> **SOLUTIE PENTRU UN SOL CONTAMINAT**

- **Constructie care poate fi asamblata la locul montajului terenului**
- **Placi sintetice care se fixeaza intre ele sub gazonul sintetic**
- **apa se scurge lateral**

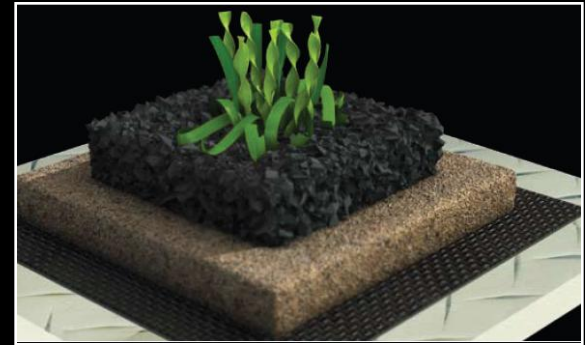

GAZON ARTIFICIAL INSTALARE

Pasul 1 – Sub baza

- 1. Evaluare locatie**
- 2. Analiza sol**
- 3. Constructia sub bazei**
 - stabilitate (>30 Mpa)
 - Rezistenta la inghet
 - Scurgere
 - Plat si plan

DOMOFLEX XC

Strat absorbție securi

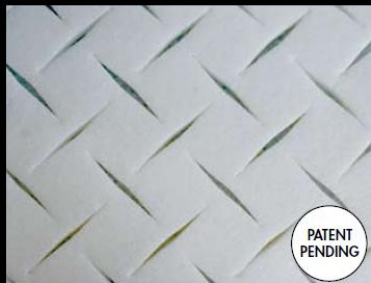

Domoflex is the latest product on the market for shock-absorbing mats. Apart from its guaranteed sporting qualities, high shock absorption, low energy restoration and long lifespan, this product offers a number of additional unique benefits and all this at a budget-friendly price.

- Thickness: 8 - 10 - 12 mm
- Density: minimum 50 - 70 Kg/m³
- Shape: rolls are 2 m wide, length is adjustable

Dimensionally stable

Expansion and shrinkage created by fluctuations in temperature are counterbalanced by the groove structure applied in advance. The special treatment that this shock-absorbing mat receives to generate this stability, particularly stamping and stretching, is patented.

Water permeability

The closed cell structure ensures that Domoflex does not absorb water. The ingenious groove structure allows for water to be drained perfectly. Therefore, this mat cannot freeze or harden and offers optimal comfort in all weather conditions.

Fast installation - no special equipment required

The Domoflex product is light and easy to install. The rolls are 2 metres wide and easy to unroll. No specialised material is required to work with Domoflex.

Consistent surface

Standard enhanced PE tape is used to bond Domoflex together. This is the same material as Domoflex itself, which results in a consistent base. Ideal for recycling, but also to prevent expansion and shrinkage.

Pasul 3 – Instalarea gazonului sintetic

1. Rularea roloilor de gazon sintetic
2. Pregatirea de lipirea
3. Lipire imbinaturi
4. Taiere marcaje
5. Umplere cu nisip
6. Umplere cu granule de cauciuc

Multumim pentru atentia Dvs.
